# Ryan Marangattu

Los Angeles, CA | ryanmarangattu@gmail.com | github.com/mararva | ryan.marangatwo.com

Data analyst with a B.S. in Statistics and experience supporting research through survey setup, data cleaning, documentation, and reporting.

## Experience

### Data Analyst | USC Norris Comprehensive Cancer Center

**Cancer Control and Population Sciences, Los Angeles | Current role**

- Set up surveys in REDCap to support research data collection.
- Clean and organize data in Excel for research analysis and reporting.
- Conduct literature searches and prepare reports to support research activities.
- Coordinate meetings and maintain documentation for research workflows.

### Research Assistant | Cal Poly, San Luis Obispo

**March - June 2026**

- Supported evaluation of an educational applet through experimental design and student data collection.
- Documented study methods and findings in a written results report.

### Technician / Shop Assistant | ARCH Machining LLC

**June - September 2024**

- Wrote a Python script to rename CNC program files and reorganized the file repository to make programs easier to locate.
- Supported shop operations involving CNC lathes and mills.

### University Housing Student Lead | Cal Poly, San Luis Obispo

**June - September 2023**

- Built an Excel workbook to calculate biweekly hours and pay for temporary employees.
- Supported student housing operations, move-in preparation, supply inventory, and maintenance requests.

## Skills

- **Research and data:** REDCap survey setup, Excel data cleaning, pivot tables, XLOOKUP/VLOOKUP, survey administration, experimental design, literature searches, documentation, reporting.
- **Programming and analysis:** Python, R, SAS; basic SQL.
- **Visualization and collaboration:** Tableau, Excel charts, Microsoft Office, Google Sheets, Git/GitHub.

## Education

**B.S. in Statistics** | California Polytechnic State University, San Luis Obispo | June 2026

Relevant study: experimental design, survey sampling and methodology, linear modeling, probability, and statistical learning.

## Selected projects

### Colonel Blotto Game | R, Shiny | February 2026

Built an interactive resource-allocation game with weighted battlefields, an adaptive computer opponent, and outcome visualization.

Project overview · Play the game · Source code

### Cal Poly student employment survey | R, SAS | December 2024

Collected survey data on students' employment experiences, cleaned responses in SAS, created visualizations in R, and presented findings to a nontechnical audience.
